

Coaxial Technology

Distribution equipment, wall outlets and cables

on

As a supplier of broadband communication technology braun teleCom has stood for competence and continuity for more than 35 years. With our long experience and constantly growing know-how we have become a leading supplier of systems and components for FTTX and HFC broadband networks.

While, in many areas, our activities focus on the development and production of our own products, we also serve as distributor for selected high-performance partners to achieve best possible customer satisfaction.

Further to our FTTX and HFC product lines, consisting of active and passive components, we have continually expanded our range by successfully integrating sophisticated services into our portfolio.

braun teleCom is powered by Netceed, a global leader in distribution, logistics, technical engineering, and product design with over 30 years of expertise and performance supporting the telecommunications and broadband industry.

Founded in 1993 by Cédric Varasteh, Netceed supplies and distributes a comprehensive range of passive and active equipment and tooling for network deployment, upgrades, and maintenance, supporting all technologies including FTTH, FTTX, HFC, Wi-Fi, 5G/Mobile, and Data Center.

Netceed employs over 1.550 people across 15 countries and counting, and its experienced team works hard every day shaping the future of communication networks across the globe.

"XiLine plus" taps and splitters

2-way, 3-way, 4-way, 6-way and 8-way splitters

A
KLASSE
CLASS
+10 dB

Xilene® plus

- Frequency range 5 – 1.218 MHz
- High-grade ferrit technology with excellent intermodulation resistance
- 360° gold plated inner conductors, high-grade dielectric inserts for excellent linearity and adaptation
- Housing plated with CuSn white bronze
- Block capacitors at each in- and output port against DC hum modulation

- Compact die-cast housing with grounding connections
- 6-way and 8-way splitters as well as 4-way, 6-way and 8-way taps are mountable in horizontal and vertical positions
- High screening factor (≥ 110 dB) exceeding EN 50083-2 Class A +10 dB
- Return loss > 22 dB at 47 MHz -1,5 dB/Oct. according EN 60728-4 Grade 1

1-way and 2-way taps

84020110
SiT 1-10

**KLASSE
A
CLASS**

84020220
SiT 2-20

- Frequency range 5 – 1.300 MHz
- Nickel-tin plated brass connectors lead to a minimum failure rate
- Literally maintenance-free, creating a unique OPEX advantage
- Field proven! No lose cable connectors as the Signia connector is temperature- and corrosion-resistant
- Designed for DOCSIS® 3.1

- The Signia product series contains ferrite cores, which are protected against unwanted strong signals and can be driven above their linear range of operation at high power
- Protected against dust & humidity
- Screening factor Class A

Outdoor splitters and taps

1,2 GHz power inserter, splitters and couplers

- Watertight aluminium alloy housing with PU coating (IP68)
- Waterproof condition 15 PSI
- AC current path with jumpers can be switched to all outputs
- High screening factor Class A +10 dB
- All connections are 5/8"-threads

- Power rating max. 15 A, 90 VAC
- Hum modulation distance at 10 A with 70 dB average
- Surge protection 1 kV 1,2/50 µs
- Operating temperature range: -40°C ... +60°C
- Mounting angle not included (Order No. 52999000)

* At 47 MHz -1,5 dB/Oct

Remote power filters and equalizers

Remote power rating high pass filters in modular concept

- Flexible configuration of high pass filter via plug-in modules DCM-HFxx
- AC/RF bypass switch in the loop for uninterrupted service in case of a removed faceplate, e.g. to change the plug-in module
- Power passing to the loop (IN – OUT) by 12 A at 65/90 VAC
- Hum modulation distance at 10 A/90 VAC -60 dB average
- Surge protection 6 kV 1,2/50 µs

Parameter	Plug-in module high pass filter DCM-HF30	Plug-in module high pass filter DCM-HF85

Order No.	57863000	57868500

Uninterrupted AC & RF transmission in the loop

An integrated power passing bar between in- and output provides an uninterrupted AC and RF signal forwarding to the downstream network.

- Watertight aluminium alloy housing with PU coating (IP65)
- Waterproof condition 15 PSI
- All connections are 5/8" threads
- 100 dB min. RFI isolation
- Mounting angle not included (Order No. 52999000)

Assembling of tap modules into the FSP housing

Remote power rating line equalizer in modular concept

- Flexible configuration of the equalizer via plug-in modules DCM-65EQ-xx
- AC/RF bypass switch in the loop for uninterrupted service in case of a removed faceplate, e.g. to change the plug-in module
- Power passing to the loop (IN – OUT) by 12 A at 65/90 VAC
- Hum modulation distance at 10 A/90 VAC -70 dB average
- Surge protection 6 kV 1,2/50 µs

- Watertight aluminium alloy housing with PU coating (IP68)
- Waterproof condition 15 PSI
- All connections are 5/8" threads
- 100 dB min. RFI isolation
- Mounting angle not included (Order No. 52999000)

Repair gaskets

For a simple, safe, and fast repair of defective sheathing of plastic-insulated cables and wires.

Suited for	Outdoor, underground and indoor cabling
Internal pressure density	Up to 0,15 Mpa (1,5 bar)
Wall thickness (shrunk)	2,3 mm
Correct length of gasket	At least twice the cable or wire diameter, to ensure sufficient overlap on both sides of the damaged part

Parameter	RM 47-13/250
Length A [mm]	200
Cable diameter [mm]	Minimum 15 Maximum 46
Inner diameter B [mm]	Before shrinking 47 After shrinking 13
Order No.	43026000

House leading-in shrink sleeves

For a professional cable lead-in into buildings. Cables led through walls of up to 500 mm wall thickness can be effectively sealed by house lead-in shrink sleeves.

Tested and field-proven according DBP TL-Nr. 736 840 TV 2 standards.
Waterproof up to 1 bar; gasproof up to 0,2 bar.

STD Snap-On wire markers

For simple and permanent marking or assignment of cables, wires, leads and cores after their installation.

Easy installation: The "wand" applicator is pushed over the marking line and the marker with your thumb over it. The marker opens and firmly grips the cable. Due to the particularly high material tension, the markers are non-slip.

Features and benefits

- Made of high-quality, extremely elastic polyoxymethylene
- Resistant against oil, cleaning agents, fuels and alkaline solutions
- Guarantees strength, dimensional stability, low moisture absorption and resistance to chemicals
- Halogen-free
- No stress crack generation
- Highest resilience
- Good sliding behaviour
- Operating temperature range -40°C ... +106°C

Snap-On wire markers

Description	Color code	Color of applicator	Amount	Suitable for cable outer diameter
STD-01	Y (yellow) or W (white)	green	300 markers on 10 applicators	1,00 – 1,40 mm
STD-03	Y (yellow) or W (white)	green	300 markers on 10 applicators	1,90 – 2,65 mm
STD-05	Y (yellow) or W (white)	natural	300 markers on 10 applicators	2,30 – 3,00 mm
STD-06	Y (yellow) or W (white)	red	300 markers on 10 applicators	2,60 – 3,50 mm
STD-09	Y (yellow) or W (white)	blue	300 markers on 10 applicators	3,25 – 4,50 mm
STD-12	Y (yellow) or W (white)	yellow	300 markers on 10 applicators	4,50 – 6,00 mm
STD-15	Y (yellow) or W (white)	–	50 markers without applicator	5,80 – 8,00 mm

Applicators

Accessories

Grounding ring RG11/220

Include the RG11-CX3 compression connectors into the local potential equalization, suitable for the compression connectors FM-RG11-CX3 7,5; 3,5/12M-RG11-CX3 7,5; 5/8MU-RG11-CX3 7,5 and IEC14M-RG11-CX3 7,5 Order No.. **60300900**

TrueDrop connectors

Less signal noise, more user-friendliness and better overall reliability thanks to our proprietary, self-centering, conical connector interface, make TrueDrop connectors very adaptable

to a variety of connection conditions, offer a uniform 360-degree contact, eliminate air gaps, reduce damage to the O-ring and counteract the rotation of the sleeve.

Mounting instructions for F-TrueDrop connectors

Step 1

Strip the cable.

Cut and remove the outer braid and foil. Leave only the first layer of braid (if needed, adjust cable stripper accordingly). Clean the cable inner and outer conductor with a conductor cleaner or any other appropriate equipment. For your safety and best results Corning Cabelcon's pre-adjusted Cable Stripper is recommended. Please find further information concerning these tools within our tools catalogue. Don't forget – read the enclosed user instruction before using the tool.

Step 2

Verify stripped dimensions by using the cutting guide on the connector.
A = 6,5 mm (outer conductor)
B = 6,5 – 8,0 mm (inner conductor)

Step 3

Brush/fold exposed braid back over jacket by using a stripping tool brush (if available) or any other nonmetallic brush.

Step 4

Push the connector over the foil, allow the support sleeve to slide between the foil and braid. Press and turn until the dielectric is flush with the support mandrel face.
For better connector and cable grip, a connector mounting and cable rubber grip tool can be used. Please find further information in our tools catalogue.

Step 5

Compress the connector by using the recommended compression tool.
Please find further information on compression tools in our tools catalogue.

Mounting instructions for FM QM-TrueDrop connectors

Step 1

Strip the cable.

Cut and remove the outer braid and foil. Leave only the first layer of braid (if needed, adjust cable stripper accordingly). Clean the cable inner and outer conductor with a conductor cleaner or any other appropriate equipment. For your safety and best results Corning Cabelcon's pre-adjusted Cable Stripper is recommended. Please find further information concerning these tools within our tools catalogue.

Don't forget - read the enclosed user instruction before using the tool.

Step 2

Verify stripped dimensions by using the cutting guide on the connector.

A = 6,5 mm (outer conductor)

B = 6,5 – 8,0 mm (inner conductor)

Step 3

DO NOT FOLD BACK THE BRAID.

Step 4

Slide the connector gently on the cable until the PushPin™ is visible as shown left to indicate proper installation of the cable. Do not twist the connector during this operation. Make sure that the braid goes nicely into the connector. Do not bend the braid back.

Step 5

Compress the connector by using the recommended compression tool. Please find further information on compression tools in our tools catalogue.

- MKL 0,8/3,5,
- BTC 1000/26,
- H125 CH,
- BKS 2050/30,
- BTC 1000/20 Cu,
- WKL 1,0/4,6 und
- WKL 1,0/4,8 CH.

Crimp your connectors here for:

- PRG 11 Cu,
- PRG 11 DB+ and
- KKL 1,6/7,2.

**Please use only the recommended crimp tool
with Order No. 55230000!**

Please find further information within our tools catalogue.

CRP 106F - .324" + .475"

Splicing instructions for compression connectors

Step 1: Strip the cable

We strongly recommend the use of our pre-adjusted Rotary Cable Stripper for RG 6, RG 59, H 121 B and H 123 B (Order No. 55294000) especially the cable stripper RG 11 (Order No. 55295000) for proper preparation of the cable. You can find further information concerning cable strippers within our tools catalogue. Please read the instructions supplied with the tool. Make sure not to damage the braid or foil during the stripping process. After completing the operation, the braid and foil must be smooth and the prepared.

Cable dimensions: A = 6,5 mm; B = 6,5 mm

Do not cut off the braid or cut into the foil or center conductor!

Step 2: Prepare the cable

Fold exposed braid back over the jacket. **This does not apply for FM-CX3 Mini and QuickMount connectors.** For "Quad shield", "Tri shield" and "Super shield" cables: Remove the outer braid and foil only. Fold back the inner braid. Leave the inner foil attached to the dielectric. Make sure that the foil is undamaged and smooth. If the inner conductor is too long, you may cut it down to a length of 6,5 mm. Check the length to fit the guide as shown.

Step 3: Mount the connector

Press the front part of the connector (with the built-in "tool") against the cable and turn it slowly to prepare the foil entering the connector (not for FM-RG11-CX3, FM CX3 Mini, QuickMount and IEC-connectors).

Push the connector over the foil and allow the support mandrel to slide between the foil and the braid. A crimp handle (Order No. 55240000, only for F-connectors) and a rubber tool for cable support can be used to keep better grip on the connector and the cable during this operation. Please find further information within our tools catalogue.

Press-on the connector and turn until the dielectric is flush with the support mandrel face. At the FM-RG11-CX3 push the connector against the cable until the moveable pin is pushed forward and becomes visible as shown.

Step 4: Compress the connector

Use the compression crimp tool CAT-AS-IEC/F-FX (Order No. 55410100). Release the tool handle, insert the connector with mounted cable and close the tool handle completely as shown. Release the tool handle and remove the compressed connector. You can use the compression tool CX3 (Order No. 55415500) alternatively. Please find further information concerning compression tools within our tools catalogue.

ATTENTION!

When mounting the connector into the tap, please make sure to tighten the nut with a torque of 3,4 – 5,6 Nm to avoid a decreased of performance within your network. You can find a corresponding torque wrench in our tools catalogue.

Splicing instructions for F-crimp connectors

Step 1

We strongly recommend the use of the Rotary Cable Stripper for RG 6, RG 59, H 121 B and H 123 B (Order No. 55294000) for proper preparation of the cable. You can find further information concerning cable strippers within our tools catalogue.

Stripping dimensions:

A = 6,5 mm (4 mm for EPA short).

B = 6,5 mm at IEC 169-24 (Europe) (8 mm for EPA short).

B = 8,0 mm at SCTE SP 401-199x (USA) (9,5 mm for EPA short).

However, a "B-dimension" of 6,5 mm (8,0 mm for EPA short) will be sufficient in most cases.

Do not cut off the braid or cut into the foil or center conductor!

Step 2

Fold exposed braid back over jacket. For "Quad shield", "Tri shield" and "Super shield" cables: Remove the outer braid and foil only. Fold back the inner braid. Leave the inner foil attached to dielectric. Make sure that the foil is undamaged and smooth.

Step 3

Press the front part of the connector (with the built-in "tool") against the cable and turn it slowly to prepare the foil entering the connector (not EPA).

Step 4

Push the connector over the foil and allow the support mandrel to slide between the foil and braid.

Step 5

A crimp handle can be used to keep a better grip on the connector during installation. Please find further information within our tools catalogue.

Step 6

Press and turn until the dielectric is flush with the support mandrel face.

Step 7

Crimp the connector using the proper crimp tool dimension: MINI = .262", ALM = .324", UNIV = .360", EPA = .360" (for cables of type RG 11: ALM = .475", EPA = .475").

ATTENTION!

When mounting the connector into the tap, please make sure to tighten the nut with a torque of 3,4 – 5,6 Nm to avoid a decreased of performance within your network. You can find a corresponding torque wrench in our tools catalogue.

Cable fittings

For connecting coaxial cables and cables on in-ground tap-offs

KLASSE A
CLASS

Instruction how to chose the correct connector

1. Select the cable you are using from the table below.
2. Chose the fitting connector from the following page.
3. Replace the "- XX" with the braun teleCom type number.
4. Now you are able to order your desired connectors with the given name.

Übersicht der Koaxialkabel mit der entsprechenden Typ-Nummer

60152995
3,5/12f-C418

3,5/12f-C418 for connecting cable on in-ground tap-offs

Specially designed 3,5/12f connector for supplementary mounting to in-ground tap-offs with KES contact bush. Return loss > 44 dB at 1 GHz, impedance 75 Ω, waterproof, corrosion-resistant, max. tensile strength of 1.000 N.

Order No. 60152995

Mounting Instructions

Cut off the KES-contact bush, strip the cable with a special dual-strip tool, screw on the backnut to the corrugated copper tube, insert the inner conductor of the cable into the connector body and screw the backnut together with the body.

Connector types for cable fittings

Splicing instructions for cable fittings, here: type-46, COAX 3FFB20

Remove the sheath, the outer conductor and the dielectric in length of:

B = 16 mm

For splicereducers (SR) please see the corresponding instructions.

Remove the sheath in length of:

A = 14 mm

For splicereducers (SR) please see the corresponding instructions.

Pull the backnut over the cable as far as possible.

For couplings (SP) and cable transitions (SR), the opposite set side mounted in a similar manner.

Pull the connector body over the cable's inner conductor and screw the nut tightly onto the connector body.

For couplings (SP) and cable transitions (SR), the opposite set side mounted in a similar manner.

Please use two open-end wrenches. The nut is turned onto the connector body until it stops (metal against metal). Always hold the connector body while screwing the nut! Please find further information concerning wrenches within our tools catalogue

HEX* = 27 mm , HEX** = 27 mm

For cable transitions (SR), the largest nut must be tightened first.

Please note:

The connectors are waterproof, but must be shielded by a shrinksleeve when buried!

HÜP 862 MA coax termination box for VF-KDG

- 5 – 1.000 MHz
- Coax termination box with testpoint at output (IEC)
- Capacitor isolated output
- Protection class IP 54
- Housing sealable
- Surge absorber (ÜsAg) retrofit
- Default delivery status contains HMA1 and HMD1

Order No. 43060200

HÜP 1.218 NA coax termination box for Unitymedia

- Coax termination box with testpoint at input and output (IEC)
- With shiftable highpass (87,5 MHz)
- With shiftable equalizer 3 dB or 6 dB
- Surge absorber (ÜsAg) retrofit
- Capacitor isolated output
- Protection class IP 54
- Housing sealable

Order No. 43060601

Accessories for HÜP 862 MA

Item	Order No.
HMH1 high pass filter 85 MHz	43060203

Fixed-value equalizer with or without linear reverse path

Fixed-value equalizer with linear reverse path in F-technique

- For compensation of the frequency-dependent cable slope, only in the forward way
- Frequency range 5 – 65 MHz linear and 85 – 862 MHz as equalizer
- F-male and F-female connectors
- Small, round metal housing with integrated HEX 11 nut
- Very high return loss

Parameter	Frequency [MHz]	RW-EQ-862/3	RW-EQ-862/6	RW-EQ-862/9	RW-EQ-862/12
Through loss [dB] 5 ... 50 ... 65 MHz		0 ... 0,8 ... 1,5 ± 0,5	0 ... 0,8 ... 1,5 ± 0,5	0 ... 0,8 ... 2,0 ± 0,5	0 ... 0,8 ... 2,0 ± 0,5

Fixed-value cable simulators and UHF de-emphasis equalizers

Fixed-value cable simulators 5 – 1.000 MHz in F-technique

- For emulation of a frequency-dependent cable slope in the forward way (balancing of a preemphasis)
- Cable simulator range from 5 – 862/1.000 MHz, non-linearity at all items in the reverse path 5 – 65 MHz $\leq 0,5$ dB
- F-male and F-female connectors
- Small, round metal housing with integrated HEX 11 nut
- Very high return loss

Parameter	KS-862/3	KS-862/6	KS-862/9	KS-862/12
Cable simulation progression [dB] 5 ... 862 ... 1.000 MHz	0 ... 3,0 ... 3,5 $\pm 0,5$	0 ... 6,0 ... 6,5 $\pm 0,5$	0 ... 9,0 ... 9,5 $\pm 0,5$	0 ... 12,0 ... 12,7 $\pm 0,5$

Galvanic isolators

TRIS-1002/AEN and TZU-10-02

A
KLASSE
CLASS

TRIS-1002/AEN

- Galvanic isolation of inner and outer conductor of home installation cables
- Prevention of equipotential bonding currents (DC) between protective grounding of the 230 V network and grounding of the CATV network (connection of these two points when connecting a PC with TV card or a cable modem via outer conductor of the CATV cable)
- Preventing the drain of leakage currents (AC) via the outer conductor of the CATV cable to the CATV grounding point in the absence of protective

grounding of the 220 V socket (leakage currents are created by screen filters in power converter PSUs of PCs, with transients to ground – the PC chassis – and subsequently to be discharged via the mains voltage protective conductor to earth)

- A housing for TRIS-1002/AEN, plastic, color: ivory, is available separately with Order No. 22380011.

Parameter	Frequency [MHz]	TRIS-1002/AEN
Through loss [dB]	5 – 40	0,2 ± 0,3
	40 – 470	0,2 ± 0,3
	470 – 1.000	0,4 ± 0,3

Galvanic Isolation	1.000 – 1.006	> 18
	Inner conductor IN to inner conductor OUT & outer conductor IN to outer conductor OUT	According to EN 50083-1/A1§9 2.120 VDC for at least 1 minute not exceeding 0,2 mA leakage current, 230 V RMS 50/60 Hz not exceeding 2,0 mA RMS – surge protection at input
Order No.		22380010

TZU-10-02

The sheath current filter with isolating transformer TZU-10-02 prevents faults that can arise due to sheath currents or unfavorable grounding conditions.

Parameter	TZU-10-02
Frequency range [MHz]	5 – 1.006
Through loss [dB]	< 0,5
Return loss [dB]	> 20, -1,5 dB/OCT
Impedance [Ω]	75
Connections	F-Female
Order No.	22380015

Block filters

Block filters for star distribution of CATV networks

- Block filters to lock out some channels or channel groups in CATV star distribution networks
- F-male and F-female connectors for direct mounting onto the passive F-distribution network

- Small, round metal housing with integrated HEX 11 nut (WHPF-xx with HEX 15 nut)
- Very low crossing band width, very high rejection and low through loss
- Very high return loss, screening according EN 50083-2 Class A

Parameter	Reverse path block filters WHPF-47E	Reverse path block filters M-HPF-85	High pass filter (FM-block filter) HPF-111	Three band block filter TBF 5-108/174-230/518-1.000

Broadband antenna outlets up to 2 GHz

1-port double galvanic isolated antenna outlets up to 2 GHz

- TV-port broadband 5 – 2.000 MHz
- Intermodulation resistant according to EN 60728-4
- High screening according to Class A +10 dB
- Surface coated with CuSn white bronze plating, thereby corrosion resistant
- Available as IEC-version (double galvanic isolated IEC-male for TV) and as

- F-Version (double galvanic isolated F-female for TV)
- Cover plate SAD-03, color Pure white RAL 9010, with removable blind cap at the radio-port (Order No. 24100701)
- Surface-mount frame SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010, for multimedia outlets (Ordner No. 22080800)

		800 – 1.006	≥16,5	
		1.006 – 1.700	≥14	
		1.700 – 2.000	≥12	
Intermodulation ⁽¹⁾ (dB μ V min)			115	
Galvanic Isolation			≤ 8 mA, 230V AC 50/60 Hz; ≤ 0,7 mA, 2.120 VDC (1 minute)	
Surge protection			1 kV 1,2/50 µs	
Order No.			24000005	

⁽¹⁾ With test signals P = 60 MHz, Q = 65 MHz applied at DATA, TV OUT respectively, intermodulation distortion level is ≤ 15 dB μ V at 2 P = 120 MHz, at P + Q = 125 MHz, at 2 Q = 130 MHz

Also available as a bundle!

The btv-1-IEC-NL-SET includes, in addition to the 1-port double galvanic isolated antenna outlet btv-1-IEC-NL, a matching surface-mount frame, a cover plate and 2,0 m Cu grounding cable! Order No. 24000007

Accessories

Double galvanic isolated connection box, 5 – 2.000 MHz, Input: F-male with ground connector, tap loss typ. 1 x 0,5 dB, intermodulation resistant according to DIN EN 60728-4, high screening according to Class A +10 dB, as bundle incl. ABS isolated plastic frame, Pure white RAL 9010 & 2,0 m Cu grounding wire
btv-DGIB-1-SET: Output 1x IEC-male Order No. 24000008

24000008
btv-DGIB-1-SET,
front and back view

1-port and 2-port broadband antenna outlets up to 2 GHz

- All outlets with broadband ports 5 – 2.000 MHz
- Intermodulation resistant according to EN 60728-4
- High screening according to Class A +10 dB
- Clamp technology for inner conductor with diameter 0,4 – 1,2 mm
- Surface coated with CuSn white bronze plating, thereby corrosion resistant
- Suitable for coax cables with diameter 4,1 – 7,2 mm

- 7 versions with 1-port and 2-port as well as with IEC- and F-connections available
- Cover plate SAD-03, color Pure white RAL 9010, with removable blind cap at the radio-port (Order No. 24100701)
- Surface-mount frame SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010, for multimedia outlets (Order No. 22080800)

						24000260

⁽¹⁾ With open input (accordant POE-Filter)

⁽²⁾ With test signals P = 60 MHz, Q = 65 MHz applied at DATA, TV OUT respectively, intermodulation distortion level is ≤ 15 dBµV at 2 P = 120 MHz, at P + Q = 125 MHz, at 2 Q = 130 MHz

⁽³⁾ These specifications are typical values, the IN-Port attenuation at the cross bands of each mentioned frequency band can exceed or fall below by 0,3 dB max. in mass production.

⁽⁴⁾ These specifications are typical values, the Port-Port isolation at the cross bands of each mentioned frequency band can fall below by 1 dB max. in mass production.

Accessory: btv-01-SET: btv 01-UPC incl. SAD 03 (neutral) as bundle

Order No. 24000002

2-port multimedia broadband antenna outlets

with DATA-port (5 – 1.800 MHz) and TV-port (258 – 1.800 MHz)

21932504
btv-MMD-504-s

21932514
btv-MMD-514-d

- Dimensions according to DIN 45330
- Quick and comfortable installation thanks to push-pin clamp technology
- High protection against any LTE ingress (LTE safe)
- Zinc die-cast housing with polished finishing
- Clamp technology for inner conductors with a diameter of 0,4 – 1,2 mm
- Suitable for coaxial cables with a diameter of 4,1 – 7,2 mm

- Surge immunity 1 kV according to IEC 61000-4-5 level 2
- Broadband DATA-port 5 – 1.800 MHz, selective TV-port 258 – 1.800 MHz
- Ready for DOCSIS® 3.1
- Cover plate SAD-122, white RAL 9010, is not included and needs to be ordered separately (Order No. 22080122)
- High screening according to Class A +10 dB following DIN EN 50083-2

⁽¹⁾ In frequency range 258 – 266 MHz with additional 0,5 dB attenuation

⁽²⁾ In frequency range 1.700 – 1.800 MHz with additional 0,5 dB attenuation

⁽³⁾ With 2 x 120 dBµV test signals combined and applied to DATA-Port:

Test 1: f1 = 60 MHz, f2 = 65 MHz, IM2 = 2 x f1 + f1+f2 + 2 x f2

Test 2: f1 = 199 MHz, f2 = 204 MHz, IM2 = 2 x f1 + f1+f2 + 2 x f2

Broadband push on adapters

2-port and 3-port broadband push on adapters up to 2 GHz

- All connections with broadband ports 5 – 2.000 MHz
- Intermodulation resistant according to EN 60728-4
- High screening according to Class A +10 dB
- Suitable for mounting onto the TV-port of antenna outlets
- Surface coated with CuSn white bronze plating, thereby corrosion resistant
- Supplied with a protection plastic cap
- Versions with 2-port and 3-port as well as with IEC- and F-connections available
- POA-01-B: RF performance acc. to Kabelkeur PVE 5.0 Keurmerk

2-port push on adapters with band pass filter, IEC-male & F-female

- Suitable for mounting onto antenna outlets with IEC-male at TV-port
- 1 input IEC-female at rear side
- 2 outputs, each one IEC-male and F-female
- Intermodulation resistant according to EN 60728-4 and after 1kV pulse applied at each port

- High screening according to EN 50083-2 Class A +10 dB
- Surface coated with CuSn white bronze plating, thereby corrosion resistant
- Supplied with a protection plastic cap (Pure white RAL 9010)
- TV/Radio-port (IEC-male) with band pass filter (specifications below)
- Data-port broadband 5 – 2.000 MHz

Order No.		24100012	24100015	

⁽¹⁾ At 40 MHz -1.5 dB/Oct.

⁽²⁾ In frequency range 85 – 125 MHz with additional 0,5 dB loss; means 5,5 dB max.

In frequency range 750 – 800 MHz with additional 0,5 dB loss; means 5,5 dB max.

In frequency range 800 – 862 MHz with additional 2,0 dB loss; means 7,0 dB max.

⁽³⁾ In frequency range 50 – 65 MHz with additional 2,0 dB tolerances in mass production

⁽⁴⁾ In frequency range 254 – 260 MHz with additional 0,5 dB loss; means 5,5 dB max.

In frequency range 750 – 800 MHz with additional 0,5 dB loss; means 5,5 dB max.

In frequency range 800 – 862 MHz with additional 2,3 dB loss; means 7,3 dB max.

⁽⁵⁾ In frequency range 950 – 1000 MHz with additional 2,0 dB tolerances in mass production

⁽⁶⁾ In frequency range 950 – 1000 MHz with additional 5,0 dB tolerances in mass production

⁽⁷⁾ In frequency range 85 – 100 MHz with additional 2,0 dB tolerances in mass production

⁽⁸⁾ In frequency range 254 – 260 MHz with additional 2,0 dB tolerances in mass production

⁽⁹⁾ In frequency range 470 – 862 MHz with additional 2,0 dB tolerances in mass production

⁽¹⁰⁾ In frequency range 198 – 204 MHz with additional 2,0 dB tolerances in mass production

⁽¹¹⁾ With 2 carriers 60 & 65 MHz (115 dB μ V) applied at OUT – OUT ports, according to EN 60728-4 and after 1 kV surge pulse at each port, intermodulation distortion level is ≤ 10 dB μ V at 2 P = 120 MHz, at P + Q = 125 MHz, at 2 Q = 130 MHz.

2-port and 3-port push on adapters up to 2 GHz with selective radio-port

- Intermodulation resistant according to EN 60728-4
- High screening according to Class A +10 dB
- Suitable for mounting onto antenna outlets with IEC-male at TV-port
- Surface coated with CuSn white bronze plating, thereby corrosion resistant
- Supplied with a protection plastic cap
- TV and DATA-ports with FM filter, therefore transmission range 5 – 65 & 120 – 2.000 MHz (no FM, S 2 and S 3)

3-port SAT antenna outlet

SMATV antenna outlet with frequency range 4 – 2.400 MHz

21030000
btv-300-SAT

- Special satellite TV-port (F-female) for the separate connection of a satellite receiver
- Qualified for digital transmission and for a combined transmission of satellite, terrestrial and/or cable TV signals (also S2 and S3)
- Qualified for reverse path transmission, via TV- or RF-port
- TV- and RF-ports designed as broadband ports with equal tap loss on TV and RF
- DC-Powerpass via SAT-port for LNB-powering (incl. 22 kHz- and DiSEqC-signal)
- Very high isolation between TV/RF-port and SAT-port

- Galvanic isolation of the inner conductors at TV- and RF-Port against hum modulation and leakage currents
- Screening according EN 50083-2 Class A:
 - > 84 dB (30 – 300 MHz)
 - > 80 dB (300 – 470 MHz)
 - > 75 dB (470 – 1.000 MHz)
 - > 55 dB (1.000 – 2.400 MHz)
- Cover plate SAD-155, 80 x 80 mm, color Pure white RAL 9010, will be delivered together with the outlet (Order No. 22080600)
- Surface-mount frame SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010 (Order No. 22080800)

Parameter	Frequency [MHz]	btv-300-SAT

** f = 109 MHz -1,5 dB/Oct.

4-port multimedia/SAT antenna outlets

with an additional SAT-port, 5 – 65 MHz reverse path

- Specially designed for operations in satellite IF distribution networks in combination with multimedia applications
- Special SAT-port (F-female) 950 – 2.400 MHz for the separate connection of a satellite receiver
- DC Powerpass SAT to IN for LNB powering 500 mA max. including 22 kHz and DiSEqC signals
- Special DATA-port (F-female) for the separate connection of a cable modem
- TV- and RF-ports designed as broadband ports with equal tap loss on TV and RF
- Very high isolation between TV/RF and DATA-port to avoid influences of TV-IF frequency by ingress of reverse signals

- Galvanic isolation protection of TV-, RF- and DATA-port against hum modulation and leakage currents (inner conductors only)
- Intermodulation resistant according to DIN EN 60728-4
- Screening according EN 50083-2 Class A:
 - > 85 dB (30 – 300 MHz),
 - > 80 dB (300 – 470 MHz),
 - > 75 dB (470 – 862 MHz)
- Cover plate SAD-401, 80 x 80 mm, color Pure white RAL 9010, will be delivered together with the multimedia outlets (Order No. 22090401)
- Surface-mount frame SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010, for multimedia outlets (Order No. 22080800)

* f = 40 MHz -1,5 dB/Oct.

** f = 80 MHz -1,5 dB/Oct.

- 2 separate DATA-ports (F-females) for the direct connection of an interactive Set-Top-Box respectively PVR and a cable modem
- Very high isolation between TV/RF and the DATA-ports to avoid influences of TV-IF frequency by ingress of reverse signals, very high isolation between the DATA-ports in the reverse path range
- Galvanic isolation protection of TV-, RF- and DATA-ports against hum modulation and leakage currents (inner conductors only)
- Increased intermodulation resistance at 150 VDC/ 115 VAC/50 Hz surge in compliance with EN 60828-4
- Max. IM2 products ≤ 15 dBuV before and after surge hit (two return path signals 60 MHz and 65 MHz with 120 dBµV each)
- Screening according EN 50083-2 Class A +10 dB
- Cover plate SAD-400, 80 x 80 mm, color Pure white RAL 9010, will be delivered together with the multimedia outlets (Order No. 22090400)
- Surface-mount frame SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010, for multimedia outlets not included (Order No. 22080800)

Faceplate dimensions [mm]		50 x 50		
Order No.	22090300	22090303	22090400	22090401

Surface-mount frame

SAD-165, 80 x 80 x 33 mm, color Pure white RAL 9010

Order No. 22080800

Terminal resistors 75 Ω for antenna wall outlets

SAW-75
Diameter approximately 5 mm

Order No. 22030000

SAX-75
Diameter approximately 4 mm

Order No. 22030100

Subscriber connection cables

IEC subscriber cables

Receiver leads for CATV house distribution with IEC male and IEC female connectors. To secure the measured screening in practice the receiver leads must have a bending radius of min. 10 cm to avoid a permanent damage of the screen and a worsening of the screening!

Item	Connectors	Length [m]	Color	Compliant with KDG 1 TS 152	Order No.
FK-2-1.5-H	IEC-male and female	1,5	White	Yes	22210115

TAK-7,5-IEC	IEC-male and female	7,0	White	No	22210134
TAK-10,0-IEC	IEC-male and female	10,0	White	No	22210136

Fm/Fm modem subscriber cables

Modem subscriber cable with F-male connectors to connect a cable modem on the DATA-port of a multimedia antenna outlet. To secure the measured screening in practice the receiver leads must have a bending radius of min. 10 cm to avoid a permanent damage of the screen and a worsening of the screening!

The subscriber connection cables MAK-XXX-90 are composed of two EX 6-49/83 connectors (brand PPC) and an Oren HD-103 coaxial cable.

Item	Connectors	Length [m]	Color	Order No.
MAK-1,5-FM	2 x screwable F-male	1,5	White	22210216
MAK-2,5-FM	2 x screwable F-male	2,5	White	22210226
MAK-150-90	2 x screwable F-male	1,5	White	22280704
MAK-250-90	2 x screwable F-male	2,5	White	22280705
MAK-350-90	2 x screwable F-male	3,5	White	22280706
MAK-500-90	2 x screwable F-male	5,0	White	22280707

We do not have the perfect connection cable in our product portfolio yet?

We are happy to produce connection cables according to your requirements, even in small quantities!
