

Optical Systems

Active and passive components

on

As a supplier of broadband communication technology braun teleCom has stood for competence and continuity for more than 30 years.

With our long experience and constantly growing know-how we have become a leading supplier of systems and system components for multimedia cable TV networks. Further to our traditional CATV product line, consisting of active and passive components, we have continually expanded our range by integrating sophisticated optical system technologies as well as services encompassing CATV and FTTx network planning into our portfolio.

While, in many areas, our activities focus on the development and production of our own products, we also serve as distributor for selected high-performance cooperation partners.

We have set high quality standards for our entire range of products and services, while ensuring that we offer the best possible price-performance ratio to our customers.

braun teleCom
Quality on Line.

1550 nm optical transmitters

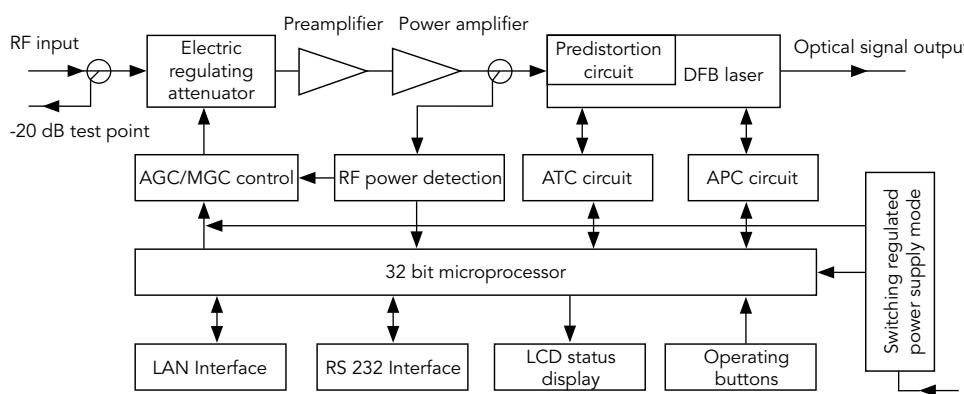

1550 nm directly modulated optical transmitter (45 – 1.218 MHz)

10420211
OTXi-1550-1xX-1,2G

- Cost effective 1550 nm optical transmitter for use in HFC networks with short fiber lengths and modest requirements
- Conversion of RF signals in amplitude-modulated optical signals for the forward path in CATV HFC networks
- Equipped with either ORTEL or AOI DFB lasers for a very good linearity and high optical output power
- Independently developed digital automatic processing technology in the RF drive part, automatic processing of the drive level power according to the actual RF input signal level and the channel loading to ensure the optimal value of system parameters
- Advanced multi-frequency RF pre-distortion technology, combined with GaAs amplifier stages, ensures an effective improvement of the system parameters
- Advanced 32 bit processor, built-in blue screen 160 x 32 dot matrix LCD monitor
- System parameter setting by front panel keypad, serial interface (RS 232) or user-friendly web interface
- SNMP network management functionality via RJ 45 interface
- 2 power supplies, each with 50 % load sharing, in case one power supply fails the second takes over 100 %
- Dimensions: 19"/1RU (483 x 370 x 44 mm (W x D x H))
- Weight: approx. 3,7 kg
- Connector types: SC/APC (optical) and F-females (RF and test point) – E2000/APC alternative available
- Ready for DOCSIS® 3.1

Parameter	Frequency [MHz]	OTXi-1550-1xX-1,2G
Operating wavelength [nm]		1550 ± 20
Optical output power [mW/dBm]		10/10
Optical return loss [dB]		≥ 50
RF frequency range [MHz]		45 – 1.218
RF input level range [dBµV]		72 ... 88
Frequency response [dB]		± 0,75
AGC control range [dB]		± 5
MGC control range [dB]		0 – 10
Return loss [dB]	45 – 550 550 – 1.218	≥ 16 ≥ 14
System parameters		42 channels CENELEC, 4 % OMI, 20 km fiber length, Rx = 0 dBm
Composite Second Order (CSO) [dBc]		≥ 60/≥ 63
Carry-to-Noise (C/N) [dBc]		≥ 48
Optical connectors		SC/APC
Supply voltage [VAC]		2 x 110 – 250/50 Hz (50 – 50 load sharing)
Power consumption [W]		< 30
Operating temperature range [°C]		0 ... +45
Storage temperature range [°C]		-20 ... +65
Max. relative humidity (operation and storage)		max. 95 %, no condensation
Order No.		10420211

1550 nm externally modulated optical transmitter (47 – 1.006 MHz)

10420327
OTXE-1550-2x7-1G

- Narrowband and very low noise DFB laser for a very good linearity and excellent system parameters
- Designed for the operation with optical amplifiers (normal-power EDFA and high-power EDFA)
- Suitable for the realization of optical transmission links of over 100 km
- Setting of an automatic gain control (AGC) or a manual gain control (MGC)
- Perfect SBS suppression circuit, adjustable SBS threshold
- Optical modulator with 2 optical outputs
- 2 fans with intelligent fan control for a very long lifespan and reduction of power consumption

- Advanced 32 bit processor, LCD display
- System parameter setting by front panel keypad, user-friendly web interface or serial interface (RS 232)
- SNMP network management functionality via RJ 45 interface
- 2 redundant and hot-pluggable power supplies each with 50 % load sharing, in case one power supply fails the second takes over 100 %
- Dimensions: 19" /1RU (483 x 455 x 44 mm (W x D x H))
- Weight: approx. 5,5 kg
- Connector types: SC/APC (optical) and F-females (RF and test point) – E2000/APC alternative available

Optical amplifiers

EDFA-1550-XxX-HP-1U high power optical amplifiers

10420718
EDFA-1550-4x18-HP

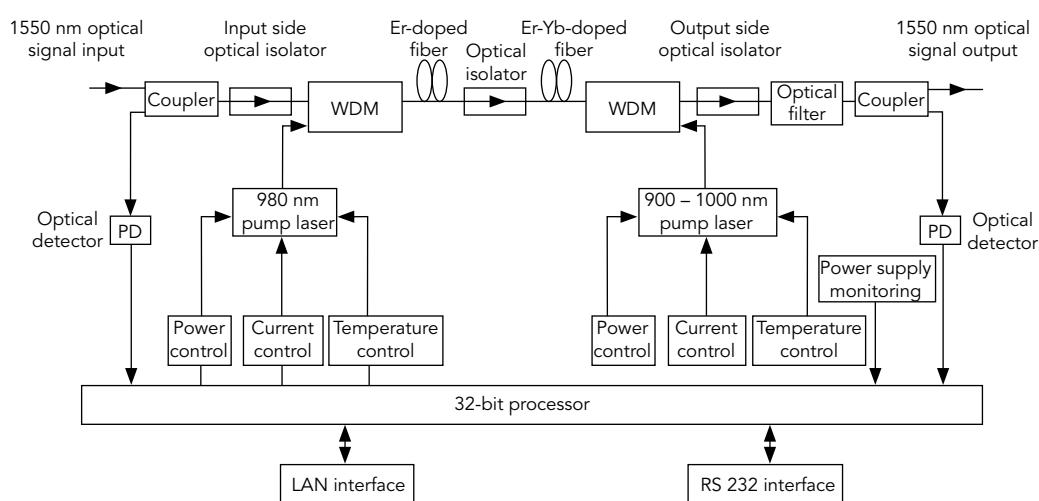

- Adopts erbium ytterbium co-doped double-clad fiber technology
- 4 – 16 output ports
- Extremely high optical output power per port
- Adjustable loss at the output -3 – 0 dB
- Low noise figure
- Network management interface, in line with standard SNMP network management

- Intelligent temperature control system for lowering the power consumption
- RS 232 and RJ 45 control interface
- System parameter setting by front panel keypad, serial interface (RS 232) or user-friendly web interface
- 2 power supplies with each 50 % load sharing, 160 ... 250 VAC or 48 VDC, not hot-pluggable
- Connector types: SC/APC (optical) – E2000/APC alternative available

Hardened EDFAs, optical amplifiers for outdoor cabinets

10420870
H-PON-EDFA-1550-16x17

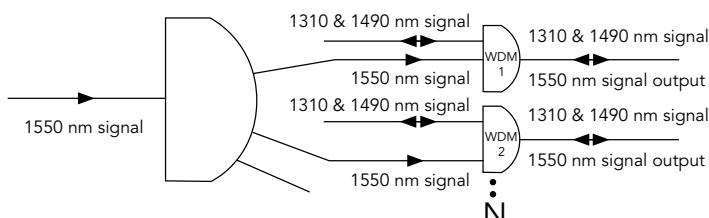

- Due to enhanced operation temperature range (-30°C ... +65°C) optimized for installation in outdoor cabinets
- Innovative cooling concept guarantees reliable temperature control in harsh environments
- Space saving design due to 45° angled optical connectors at the front side, also ensuring a low bend radius of the applied patchcords
- Compact design with only 24 cm of installation depth for usage within street cabinets
- Adopts erbium ytterbium co-doped double-clad fiber technology
- Extremely high optical output power per port
- Output power is adjustable from -3 to 0 dB
- Low noise figure

- Network management interface, in line with standard SNMP 2.0 network management
- Intelligent temperature control system for lowering the power consumption and extending the product's lifespan
- System parameter setting via front panel keypad, serial interface (RS 232) or user-friendly web interface
- RS 232 and RJ 45 control interface
- 2 hot-swappable power supplies with each 50 % load sharing, 160 ... 250 VAC or 48 VDC
- Optional redundancy switch at the input of the EDFA
- Filter replaceable from the front

Further H-PON-EDFA models are available on request!

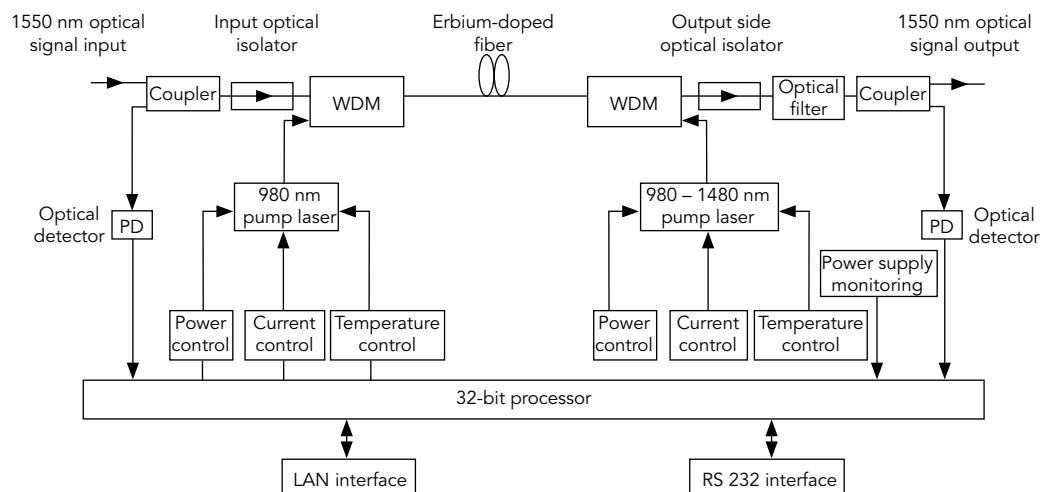

A-EDFA-1550-4-14 outdoor optical amplifier

- High-performance erbium doped fiber and low noise pump laser
- 4 output ports
- Low noise figure
- Large optical input power range
- Works under outdoor and bad environmental conditions, due to the aluminum waterproof housing
- Optical status indication with LEDs

- Network management via SNMP interface (optional)
- Highly reliable switching power supply with 110 – 265 VAC
- Connector types: SC/APC (optical)
- Dimensions: approx. 340 x 130 x 240 mm (W x H x D)
- Weight: approx. 3,9 kg

Parameter	A-EDFA-1550-4-14
Operating wavelength [nm]	1545 – 1565
Optical input power range [dBm]	-3 ... +10
Optical output power [dBm]	14
Output power stability [dBm]	± 0,5
Return loss optical output [dB]	≥ 45
Return loss optical input [dB]	≥ 45
Noise figure [dBµV]	≤ 5
Optical connectors	SC/APC
System parameters	42 channels CENELEC, 0 dBm optical input power, 100 dBµV output level, 3,3 % OMI
CSO [dBc]	≥ 64
CTB [dBc]	≥ 65
C/N [dBc]	≥ 52,5
Power consumption [W]	≤ 30
Operating temperature range [°C]	-15 ... +55
Storage temperature range [°C]	-30 ... +70
Dimensions (L x W x H) [mm]	340 x 130 x 240
Weight [kg]	3,9
Order No.	10420900

RFoG optical return path receiver

ORX-4C-200 RFoG

10420092
ORX-4C-200 RFoG

- Designed for converting optical upstream signals into RF signals in head-ends and hubs, especially for usage in RFoG network topologies
- Supports Docsis 3.0 upstream channel bonding in PON architectures
- 4 separate optical return path receivers in one compact device
- Connection of up to 256 optical RFoG micro nodes (e.g. 4 clusters with each 64 RFoG micro nodes)
- Microprocessor-controlled adjustment of system parameters using frontal keypads or via a web interface (RJ 45 or RS 232)
- **The device is switchable from "RFoG" mode to "normal" mode (continuous light at the entrance)**
- Monitoring of the optical input power via web interface in "normal" mode
- Extremely high input sensitivity

- Very high RF output level for each receiver, depending on the relevant optical input level
- Fine tuning of the RF output level for each receiver by using internal attenuators
- Optical status indication with LEDs and built-in LCD monitor
- Separate test points for measuring the RF output levels (front side)
- Extremely wide operating temperature range, thereby suitable in almost all environmental conditions
- 2 power supplies with each 50 % load sharing, in case of a failure of one power supply 100 % load transfer to the 2nd power supply
- Connector types: SC/APC (optical) and F-females (RF and test points) – E2000/APC alternative available

Parameter	ORX-4C-200 RFoG
Operating wavelength [nm]	1200 ... 1620
Optical input power range [dBm]	-27 ... -13
Equivalent noise current input [pA/Hz]	1
Optical return loss [dB]	> 50
Test point per RF output [dB]	-20 ± 0,5
Return loss output [dB]	> 16
Return loss optical input [dB]	≥ 45
RF frequency range [MHz]	5 – 200
RF output level per receiver [dBµV]	90 ... 120 (e.g.: 98 dBµV at 10 % OMI, -27 dBm, ATT. = 0 dB)
Frequency response [dB]	± 0,75
Attenuator range per receiver [dB]	-30 ... 0 (in 1 dB steps via front site, in 0,5 dB steps via web interface)
Power consumption [W]	≤ 12
Operating temperature range [°C]	-40 ... +65
Dimensions (L x W x H) [mm]	480 x 325 x 44
Weight [kg]	2,0
Order No.	10420092

Optical switch

1 x 2 optical switch for redundant optical fiber transmissions

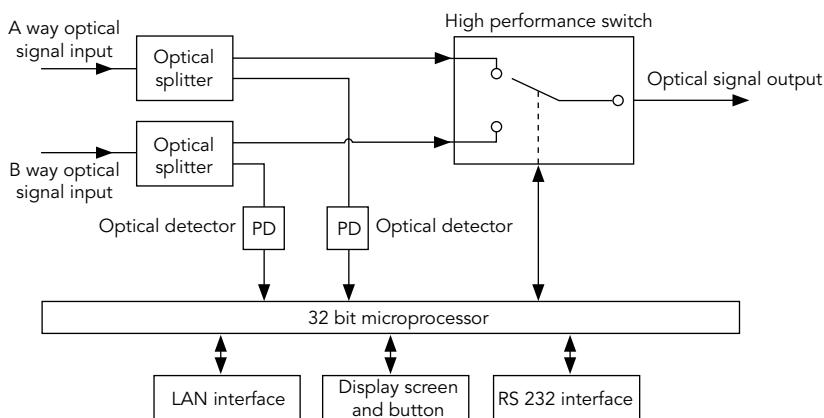

10420103
OSW-2

- Extremely short switching time
- Transmission of very high optical powers
- Advanced 32 bit processor for punctual and accurate monitoring of input power, reliable control of switch status and setup of automatic or manual switch mode
- Switches automatically when optical signal has a fault
- System parameters setting by front panel keypad or serial interface (RS 232)

- SNMP network management functionality via RJ 45 interface
- 2 power supplies with each 50 % load sharing, in case one power supply fails the second takes over 100 %
- Built-in blue screen 160 x 32 dot matrix LCD monitor
- SC/APC connectors at the front side
- Dimensions: 19"/1 RU (483 x 285 x 44 mm (W x D x H))
- Weight: approx. 2,0 kg

Parameter	OSW-2
Operating wavelength [nm]	1200 ... 1620
Max. optical input power [dBm]	27
Through loss [dB]	≤ 1,3 (tested at 1310, 1490, 1550 nm)
Return loss output [dB]	> 55
Optical return loss [dB]	> 55
Optical input power ranges [dBm]	-15 ... +24
Max. switching life (MTBF)	≥ 10.000.000
Optical connectors	SC/APC
Supply voltage [VAC]	2 x 160 – 250/50 Hz (each 50 % load sharing)
Power consumption [W]	≤ 2
Operating temperature range [°C]	-5 ... +55
Storage temperature range [°C]	30 ... +70
Order No.	10420103

Optical receivers

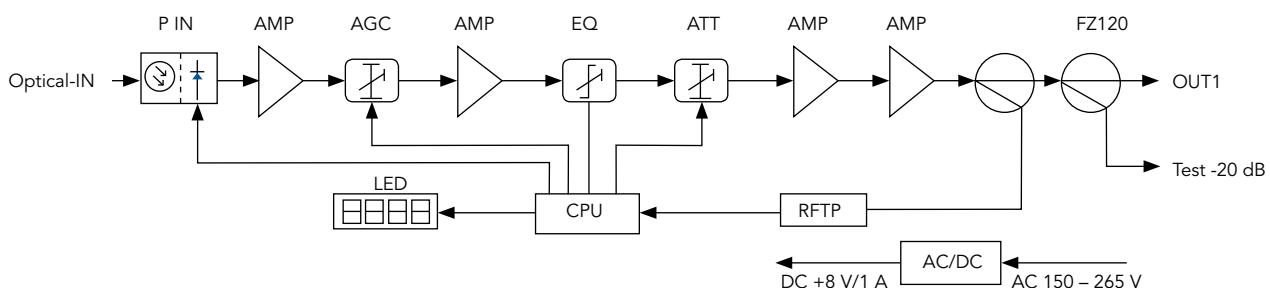

Optical broadband receivers 45 – 1.006 MHz
with high power output for CATV applications

- Optical status indication by LEDs
- Integrated test point for the RF output
- Very high and constant RF output level within the whole optical input power range by an integrated automatic gain control (AGC)
- Connector types: SC (optical) and F-females
- Dimensions: approx. 190 x 110 x 52 mm (W x H x D)
- Weight: approx. 0,4 kg

Parameter	ORC-01	ORC-01-1550	ORC-01-PON
Max. optical input power [dBm]	-9 – +2	-9 – +2	-9 – +2
Responsivity [A/W]	0,85	0,85	0,85
Optical return loss [dB]	45	45	45
Optical connectors input	SC/APC	SC/APC	SC/APC
Operation bandwidth [MHz]	45 – 1.006	45 – 1.006	45 – 1.006

Storage temperature range [°C]	-40 – +60	-40 – +60	-40 – +60
Power consumption [W]	8	8	8
Operating wavelength [nm]	1100 – 1600	1545 – 1563	1539 – 1565
PON pass through (SC/PC) [nm]	–	–	1260 – 1360 1480 – 1500
Order No.	10420060	10420062	10420064

* At P IN = -1 dBm, P OUT = 106 dB μ V, 42 CH CENELEC, OMI = 3,5 %

EPON OLT

OLT-GEPON-8-2x10GE

10426101
OLT-GEPON-8-2x10GE

- The main components of a passive optical network (PON) are the following three elements: Optical line terminal (OLT), passive optical splitter and subscriber terminal (ONU)
- The braun teleCom OLT series supports the symmetric uplink/downlink 1,25 Gbps PON transmission rate, efficient bandwidth usage and Ethernet services, helping carriers to provide reliable services to their subscribers
- Overcurrent and overvoltage protection

- Effective expansion of the PON network: Connection of up to 1.024 subscribers
- Redundant power supply with two hot-swappable power supplies (AC/DC hybrid)
- Dimensions: 19"/1 RU (483 x 285 x 44 mm (W x D x H))
- Weight: approx. 2,0 kg

Parameter	OLT-GEPON-8-2x10GE
Maximum coupling ratio	1:64
Backplane bandwidth	128G
Volume of the MAC table	32.000
Ports	16 x EPON 8 x GE (4 x GE optical ports & 4 x GE TX/SFP)
Average emitting power of the PON port [dBm]	+2 – +7
Light reception sensitivity of the PON port [dBm]	> -30
Security	ONU authentication mechanism
Standard	IEEE802.3ah; IEEE 802.1D, Spanning Tree; IEEE802.1Q, VLAN; IEEE 802.1w RSTP; IEEE 802.3ad, LACP; Ethernet – II
QoS	Backpressure flow control (half duplex); IEEE 802.3x flow control (full duplex); IEEE 802.1p, COS; WR, SP and FIFO; ONU-based uplink/downlink rate limit; DBA and SLA
VLAN	Port-based VLAN, 4.000 active VLANs, QinQ and flexible QinQ
IP routing	Static route, RIPv1/v2, OSPF, etc.
Volume of the routing table	12.000
Multicast	IGMP v1/2/3
Reliability	Unidirectional Link Detection (UDLD), Optical path protection of EPON
Network security	MAC limit, port isolation, storm control, flow-based ACL, transmission data encryption on the PON interface
Management	CLI, SNMP and TELNET, TFTP and FTP, Web Interface
Operating temperature range [°C]	0 – +55
Storage temperature range [°C]	-40 – +80
Relative operating humidity	10 – 85 %, no condensation
Relative storage humidity	5 – 95 %, no condensation
Input Voltage [V]	AC 90 – 264 DC -36 – -72
Order No.	10426101

Optical PLC Mini splitter modules

SFF-type with SC/APC or LC/APC-connectors

- Based on planar lightwave technology
- Designed as 1 x N splitter with 1 input as well as 2 x N splitter with 2 redundant inputs
- Low through loss, very low PDL
- Excellent port-to-port uniformity

- Very high return loss
- Wide wavelength range
- Highly reliable and stable
- Available in 2 grades: Standard (S) and Premium (P)
- Both grades are qualified with Telcordia standard

1 x N PLC Mini splitter (1 input)

Parameter	1 x 2	1 x 4	1 x 8	1 x 16	1 x 32	1 x 64

Fiber couplers

Optical „All Band Window“ fiber couplers with SC/APC pigtails

Optical „All Band Window“ fiber coupler with SC/APC pigtails – box style

- Transmission of all wavelengths in a range of 1260 – 1620 nm
- Very low cross talk, very low PDL
- Very low excess loss
- Excellent port-to-port uniformity
- Very high directivity, very high return loss
- Highly reliable and stable
- Premium grade
- Qualified according Telcordia standard

CWDM multiplexers

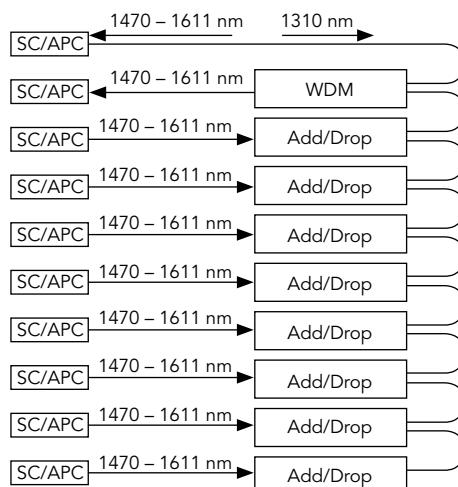

for 8 ITU channels and 1 channel 1310 ± 40 nm, with SC/APC pigtails

- For combining the 8 ITU channels C11-C18 and retrieval of the channel 1310 nm
- 1 port for 1310, each 1 port for the 8 ITU channels C11 – C18 (1471/1491/1511/.../1611 nm), 1 COM-port
- Very low through loss, very low PDL
- Very high isolation, very high directivity
- Very high return loss
- Highly reliable and stable
- Qualified according Telcordia standard

Parameter	CWDM-B-MUX 1x9-SC/APC
Central wavelengths [nm]	1310, 1471, 1491, 1511, 1531, 1551, 1571, 1591, 1611
Operating wavelengths [nm]	1310 ± 40 & 1460 – 1620
Channel space [nm]	20
Channel bandwidth [nm]	$\lambda_c \pm 6,5$
Through loss for 1460 – 1620 nm* [dB]	$\leq 3,1$
Through loss for 1310 nm* [dB]	$\leq 0,7$
Channel flatness [dB]	$\leq 0,4$
Channel uniformity [dB]	$\leq 1,0$
Isolation	
Demux-adjacent channels [dB]	≥ 30
Demux-non-adjacent channels [dB]	≥ 40

19" housings for PLC Mini splitter modules

with or without pre-assembled modules

Sample configuration with LC/PC connectors

- Pre-assembled shelves as well as empty housings available
- Designed for use in standard 19" racks
- Configured with LC/APC or SC/APC splitters
- Further connector types are available on request
- Maximum configuration: 2 inputs, 64 outputs
- Very low installation depth and high operating temperature range, therefore suitable for outdoor cabinets
- Very low through loss
- Grade PREMIUM

Blown cables

66000041
A-D(ZN)2Y, 1x4

66000047
A-D(ZN)2Y, 1x12

Blown cables are non-metallic cables with optical fibers, that are mainly installed in confined spaces within the access network. Due to the two-layer cores and the friction-optimized PE sheath, MiniXtend cables are particularly well suited for blowing into mini- or microducts. The fibers within the ducts are colored for better distinctness. MiniXtend are available with Corning SMF 28 -e™ (ITU-G 652D) single-mode fibers or Corning ClearCurve® fibers (ITU-G657 A / B) with optimized bending.

- Reduced outer diameter
- Installation of customer connections in micro tube/speedpipe systems
- Compact design with reduced weight
- Low investment costs
- Non-metallic cable structure
- No grounding necessary
- Secure transmission properties and low loss
- SMF-28e+® according to ITU-T G.652.D

Parameter	A-D(ZN)2Y, 1x4	A-D(ZN)2Y, 1x12
Application	Micro tubes/speedpipes	
Cable type	Central core A-D(ZN)2Y	
Product type	Dielectric	
Longitudinal water tightness (0,1 bar/24 h) [m]	≤ 1	
Crush resistance	1.000 N/10 cm	
Operating temperature range [°C]	-20 – 60	
Fiber category	OS2	
Fulfilled standards and norms	TIA/EIA 492-CAAB IEC 60793-2-50 Typ B1.3, ITU-T G.652 D, ISO/IEC 11801 Ed.2.2	
Fiber amount	4	12
Outer diameter [mm]	2,5	
Packaging unit [m]	2.000	
Tensile strength (short-term) [N]	80	
Order No.	66000041	66000047

Fixed core installation cables

These fiber optic cables can be used indoors for riser cabling or as distribution cables. The fixed cores enable a simple and direct plug-in field mounting without the use of a distribution adapter. The cables can be routed in cable ducts and manholes inside buildings.

- Metal-free construction
- No potential equalization required
- Low cable diameter and bending radius
- Therefore easy installation in confined spaces
- Easy and consistent peelability due to the TB3 fixed core construction
- Silicon-free sheath
- Cable sheath and outer sheath of the basic components (but 900 µm fixed core cables) are free of lacquer-wetting substances
- Flame-retardant LSZH™ / FRNC
- Fiber count: 4 or 12 pcs.

Parameter	J-V(ZN)H, 1x4	J-V(ZN)H, 1x12
Application	Indoor	
Cable type	Fixed core	
Product type	Dielectric	
Longitudinal water tightness (0,1 bar/24 h) [m]	≤ 0,1	
Fier class	LSZH™/FRNC	
Fiber category	SMF-28® Ultra Faser 0,9 mm; ITU-T G.652.D and ITU-T G.657.A1	
Coding acc. to DIN VDE 0888-100-1 (EN 60794-1-1)	J-V(ZN)H	
Former coding acc. to DIN VDE 0888-3	J-VH	
Fire behaviour	Cca, s1a, d1, a1	
Outer diameter [mm]	4,2	
Fiber amount	4	12
Packaging unit [m]	2.000	
Tensile strength at installation [N]	600	
Order No.	66000043	66000049

MiniFlex cables

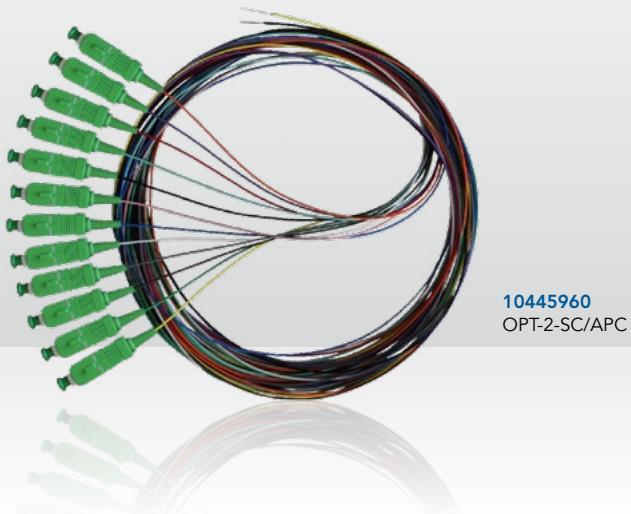

The MiniFlex Euroclass cable is a tough and lightweight optical fiber loose tube cable, available with up to 12 optical fibers. At just 2,2 or 3,0 mm outer diameter MiniFlex is a rugged, ultra-flexible drop cable solution for pushing and pulling inside raceways or for fixing directly to building surfaces. By virtue of the MiniFlex grooving technology this ruggedized lightweight fiber cable is ultra flexible whilst resisting the urge to kink like regular fiber cables. No specialist installation tools are required to push/pull MiniFlex through FTTx microducts. When combined with low-friction microducts, the cable can be pushed by hand in long routes.

- UV stabilized
- Ultra tough
- Very lightweight
- Small diameter (3 mm for up to 12 fibers)
- High crush resistance
- Best-in-class push/pull and blowability
- Ultra-flexible, small bend radius for compact slack fiber storage
- Small and unobtrusive enough for surface mount applications
- Tough enough for clipping, tacking and gluing

Indoor speedpipes

with fitting accessories

Indoor speedpipes

- For blowing in fibers, especially suitable for interior use
- Material: PD-HD acc. to DIN 16874
- Translucent base material for occupancy detection
- White color for restrained indoor hauling
- Optimized trapezoidal internal groove for optimal blowing results
- Low smoke acc. to DIN EN 61034-2, flame-retardant acc. to DIN EN 61386-1 and halogen-free acc. to DIN V VDE V 0604-2-100 (LSOH) for highest security in case of fire
- VDE-tested and certified acc. to DIN EN 61386-22(VDE0605) for defining the installation

Diameter [mm]	Packaging unit [m]	Order No.
7 x 1,5	1.250	42510102
10 x 2,0	2.500	42510104

Indoor connectors

- For pressure-tight connection of indoor speedpipes with identical diameter, high tensile strength
- Pre-assembled locking clips prevent unwanted release
- Metal-free and transparent base body, clamping teeth made of stainless steel
- Suitable for blowing pressures up to 15 bar
- Flame retardant acc. to DIN EN 61386-22 and UL94-V2
- Not suited for direct burial

Diameter [mm]	Packaging unit [pcs]	Note	Order No.

Simplex coiled cable

OJS-2,0-SC/APC Simplex coiled cable, yellow, 2 m

The benefit of a coiled cable is obvious: It is the bend-insensitive property of the G657 fiber, but with the through loss of a regular patchcord. This spiral cable is perfectly suitable for FTTH applications. Due to unlikely loop formations the probability of kinked fibers is significantly lower compared to standard patchcords.

If you wish to order adapters with other attenuation values (1 ... 20 dB):

Please replace the last two digits of the Order No. as well as the specification within the item name with the desired attenuation value!

Termination boxes for buildings

GF-HUP 4F, compact and max

10419001
GF-HUP compact

10419008
GF-HUP max

GF-HUP 4F

The GF-HUP 4F is versatile for FTTx use for indoor and outdoor wall mounting. It combines small dimensions and weight with easy installation and handling.

- Suitable for max. capacity of 2 SC adaptors or duplex LC installation (not included)
- Max. capacity is 2 or 4 fibers of fusion splice or crimp splice
- Preinstalled PLC splitter 1 x 4 micro type
- 2 cable ports
- Suitable for indoor cable or drop cable
- IP grade: IP65
- Dimensions (WxLxH): 153 x 208 x 52 mm
- Lock included

The following accessory is included:

- 4 dowels
- 4 screws
- 10 cable ties
- 2 keys

Order No. 10418999

GF-HUP compact

In addition to the innovative fiber management and sealing concept, this termination box for buildings offers a maximum of possible applications. The installation effort is significantly reduced. This solution offers longevity and maximum investment protection.

- 12 x splice tray
- 1 x PLC splitter
- 6 x couplers inside the folding tray
- 3 x flexible, splittable seal kit for diameter 3 – 10 mm
- Optional gabocom speedpipe insertion
- Strain relief
- Lockable and removable cover
- Protection class IP54
- Dimensions: 150 mm x 212 mm x 53 mm
- Approved acc. to federal funding (Germany)

The following sealing set is included:

- 1 x diameter 10 mm
- 2 x diameter 7 mm
- 1 x 2 x diameter 7 mm
- 1 x 12 x diameter 5 mm
- 1 x 24 x up to diameter 3 mm

Order No. 10419001

GF-HUP max

The perfect connection box for a large amount of residential units

This termination box for buildings offers despite the compact design the possibility to connect up to 144 fibers. Of these, 24 fibers are spliced within the base, the other ones in cassettes. The innovative fiber management and sealing concept is identical to the GF-HUP compact. The wall mounting as well as the protection against unauthorized access are of course included.

- 144 x splice tray
- 4 x PLC splitter
- 12 x couplers inside the folding tray
- 4 x flexible, splittable seal kit for diameter 3 – 10 mm
- Optional gabocom speedpipe insertion
- Strain relief
- Lockable and removable cover
- Protection class IP54
- Dimensions: 150 mm x 212 mm x 53 mm
- Approved acc. to federal funding (Germany)

The following sealing set is included:

- 1 x diameter 10 mm
- 2 x diameter 7 mm
- 3 x 12 x diameter 5 mm
- 2 x 24 x up to diameter 3 mm

Order No. 10419008

Fiber boxes for up to 64 residential units

FTTH-Box NANO, termination of 4 fibers

- Optimal for detached houses
- 12 x splice tray
- Optimized for pre-configured fibers
- 3 x self-closing couplers, flat and hidden applicable (6 x LC)
- Patchcords are safe from being pulled unauthorized
- Entry for tubes up to a diameter of 10 mm
- Strain relief

- Inclusion of micro gas stop
- Metal mounting plate, surface- or flush-mounted outlet
- Torx screws for access security
- IP 44, UV, UL
- Dimensions: 120 x 105 x 22,8 mm (W x H x D)

Order No. 10419005

GF Box size S for 3 residential units

Scope of supply

- 2 LC/APC duplex couplers pre-installed
- 6 LC/APC pigtailed G652 Grade B
- 1 splice cassette for terminating the main cable
- 1 splice cassette for terminating the house network

Input incl. strain relief

- 1 micro duct (outer diameter 7 mm) without gas stop or
- 1 metal-free trunk cable (outer diameter 7 mm)

Output incl. strain relief

- 3 cables 2,4 – 8 mm (riser resp. connection cable)
- Sealable with grooves screw
- Plastic color: Tele grey 4 RAL 7047
- Protection class: IP55

Order No. 80100210

GF Box for up to 64 residential units

1 fiber per residential unit

Scope of supply

- LC/APC duplex couplers
- LC/APC pigtailed G652
- 1 splice cassette for terminating the main cable
- 1 splice cassette for terminating the house network

Input incl. strain relief

- 1 micro duct (outer diameter 7 mm) without gas stop or
- 1 metal-free trunk cable (outer diameter 7 mm)

Output incl. strain relief

- 2,4 – 8 mm (riser resp. connection cable)
- Sealable with EMKA lock
- Plastic color: Tele grey 4 RAL 7047
- Protection class: IP55

Order No. 80100214

Item	Amount residential units	Order No.

We do not have the perfect fiber box in our product portfolio yet?

We are happy to provide further configurations, e. g. with multiple fibers per residential unit, on request!

Termination boxes for apartments

Open Access Point and matching Basic Kit

OAP (Open Access Point)

The most compact fiber optic network termination

The OAP is a neutral network termination. It can be integrated into any FTTH network, regardless of whether "Active Ethernet" or GPON access solutions are used. The OAP is the perfect solution for connecting a fiber optic CPE. The modular structure offers the efficient development of each residential unit. Pre-assembled fiber optic cables make splicing work in the home obsolete. A CATV receiver can be used (Plug & Play) with a plug-in module.

- 1 x splice tray
- 1 x SC coupler output
- Wall- or flush-mounted socket installation
- Optical TV module Plug & Play
- Optical IN -8 dB ... 0 dB, F-OUT ... 80 dB μ V/1 GHz, AGC
- PSU 9 V DC
- Dimensions: 80 x 80 x 45 mm

Item	Description	Order No.
OAP basic element	OAP basic element for installation on standardized flush-mounted socket, incl. matching Snap-On module SC/PC	10419060
OAP CATV	Active Snap-On module with TV receiver 1 GHz, 1 x SC/PC, 230 V power supply	10419061

OAP Basic kit

The OAP Easy-Fiber install kit offers a practical self-install possibility for the end user or a enormous saving of time for the technician.

Splicing within the apartment is obsolete, from now on we are able to take on high-quality installing for you!

Besides regular cable lengths like 20 m, 30 m or 50 m, we can also provide individual lengths.

This way the fiber can be directly connected to the termination box, which is the access to your optical network.

- 4 x FO G657A2 (color-coded acc. to DIN) optical cable with 4 fibers
- 1 x splice tray
- 1 x SC coupler output
- Wall- or flush-mounted socket installation
- Optical TV module Plug & Play
- Optical IN -8 dB ... 0 dB, F-OUT ... 80 dB μ V/1 GHz, AGC
- Cable lengths of 20 m, 30 m, 50 m or individual length
- IP Ethernet module 1 Gbit
- PSU 9 VDC
- Dimensions: 80 x 80 x 45 mm

Fiber Termination

Gateways and fiber termination units

Passive FTUs with small form factor

The most flexible FTU in the industry

The FTUs consist of a neutral base/FTU in which fiber can be mounted, connected and terminated. The active gateway is designed as a click-on interface with the possibility for end-user activation. This solution is built to allow the customer to perform the service activation. The combined solution for FTU and gateway services are formed in an extremely compact form factor, 88 x 88 x 65 mm, making it viewed by the customer as just another outlet.

The FTU is ideal as a 2-box solution in combination with the gateways named below and 3rd party routers. It is available with or without pigtailed and various combinations of adapters, e.g. SC/PC and SC/APC.

The 1 Gbps gateway series is a unique and innovative product line that distinguishes itself by its small form factor and unique click-on interface. The small form factor, combined with ease of installation due to its click-on interface, makes the gateways an extremely flexible solution, with optimized handling and efficiency.

(1) Data port loop though, adapter SC/APC

(2) Support for VLANs, Q-in-Q, QoS, IGMP, Jumbo Frames and traffic shaping and manipulation

Operating temperature range [°C]	0 ... 40			
Order No.	on request			

The 10 Gbps gateway series is built to fit the well proven FTU named above. The newly developed active part is based upon a sophisticated wirespeed Layer 2 switching-based "System-on-Chip" (SoC) solution.

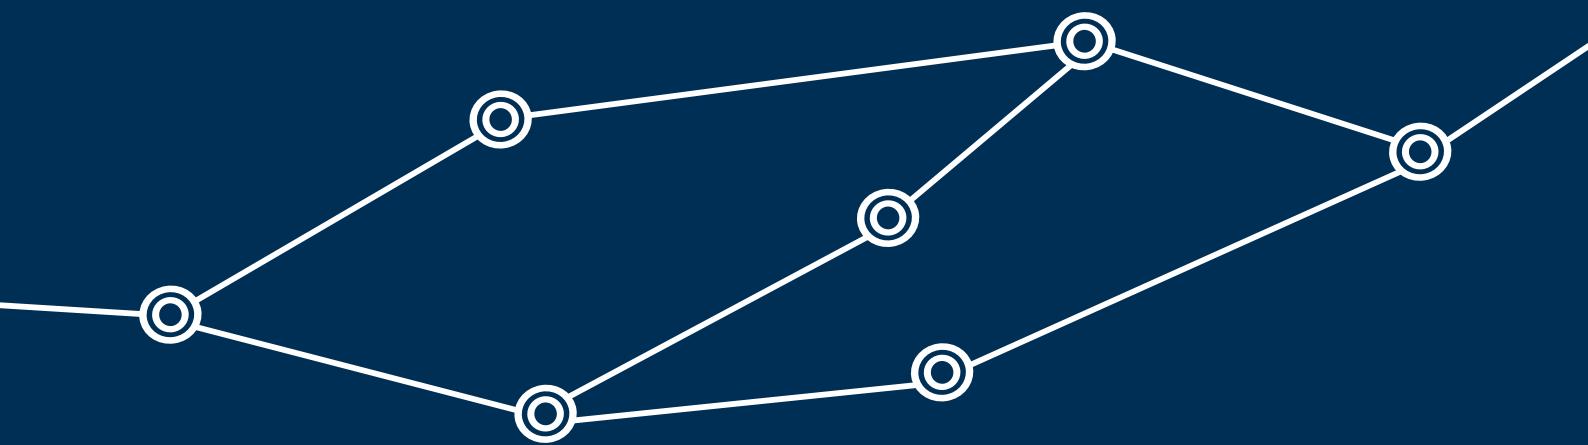

This solution implies that fiber termination and service activation occur as part of the operator's "demarcation point" at the end customer in a FTTH 10 Gbps environment.

(1) Support for VLANs, Q-in-Q, QoS, IGMP, Jumbo Frames and traffic shaping and manipulation
