Sophisticated **products**
and **solutions** for **HFC** and
FTTx broadband networks

braun teleCom

As a supplier of broadband communication technology braun teleCom has stood for competence and continuity for more than 30 years. With our long experience and constantly growing know-how we have become a leading supplier of systems and system components for multimedia cable TV- and broadband networks.

Further to our traditional CATV product line of active and passive components, we have continually expanded our range by integrating sophisticated optical system technologies as well as services encompassing CATV and FTTx network planning into our portfolio.

While, in many areas, our activities focus on the development and production of our own products, we also serve as distributor for selected high performance cooperation partners to achieve best possible customer satisfaction.

We have set highest quality standards for our entire range of products and services, while ensuring that we offer the best possible price-performance ratio to our customers.

braun teleCom

Quality on Line.

Active components

- Active Ethernet and G(E)PON
- TV headend- and IPTV-systems
- I-CMTS and R-PHY solutions
- Optical transmission systems
